LIST OF PARTICIPANTS 5

This workshop aims to share experiences in marine spatial planning in Europe and in Brazil in a governance perspective. It will be centred in a legal and socio-political perspective, to better understand (emerging) policy practices, processes and institutional contexts enabling and/or constraining MSP governance dynamics in the transboundary, North-South Atlantic.

This workshop is organized by the [PADDLE project](#) with the help and support of:

- “A estratégia brasileira de gestão sustentável dos recursos marinhos vivos e não vivos” (UnB, UFC e UPM – CAPES)
- LMI Tapioca (IRD, UFPE, UFRPE)
- Bacharelado em Oceanografia da UFPE - 10 anos
- Wageningen University
- Faculdade de Ciências da Universidade de Lisboa

Short workshop description

The proposed workshop links up to the work in the work package 3 (WP3), entitled “Governance and policy dynamics in tropical MSP”. Researchers involved in this WP employ a legal and socio-political perspective, to better understand (emerging) policy practices, processes and institutional contexts enabling and/or constraining MSP governance dynamics in the transboundary, North-South Atlantic.

From the perspective of the PADDLE researchers, the workshop has three main aims:

- Informing workshop participants about the insights gained through the review work of institutional arrangements, legal frameworks, coastal and marine policies at the national, regional and international level, with particular focus on Tropical Atlantic (task 3.1)
- Gathering information (examples, experiences) from relevant stakeholders for the mapping of relevant policies for (future) MSP in Brazil (task 3.2)
- Mobilizing knowledge, exchanging viewpoints and discussing different perspectives to derive at insights or guidelines important for the development, designation and implementation of MSP in the Tropical Atlantic (task 3.3/3.4)

For the participants, the workshop will provide:

- Enhanced understanding in MSP as (new) policy paradigm
- Enhanced knowledge about current practices and policies relevant for Brazil, Senegal and Cabo Verde (on the national, regional and international level)
- Room to contribute to constructive critical thinking about future development, designation and implementation of MSP in tropical Atlantic.
